Small Dictionary of Aviation Terms

Краткий словарь авиационных терминов

To make it easier for non-Russian speakers to pronounce the Russian words, we have in some cases departed in the spelling from the transcription table on above, because otherwise one should know all the phonetic rules as well as how to pronounce the words correctly. Nevertheless, for pronunciation please see the remarks in the transcription table. The syllable to be stressed is underlined.

The Cyrillic alphabet used by the Russian language encompasses 33 characters as opposed to the 26 characters of the Latin alphabet. Unfortunately, the transcription of some Cyrillic characters into English is not easy as several different spellings could be used. One of the main problems is that Russian is phonetic and English is not.

The soft sign is written y in front of vowels and ' after b, d and t if these stand at the end of a word.

Note: For technical reasons the soft sign ' is not used in the names of operators.

There are some special cases when the pronunciation differs from the English one:

g is never pronounced as in general

ai is to be pronounced as in eye (e.g. in Baikonur)

au is to be pronounced as a separate a and u (e.g. in nauka)

oo is to be pronounced as two separate o (e.g. in Avialesookhrana)

Characters used only by the Belarussian and/or Ukrainian alphabet:

І	і	і	i	as in ink
Ї	ї	ї	yi	as in yin
И	и	и	y	as in y'know
Ў	ў	ў	v	somewhere between a u and a v

The Russian Federation

(with thanks to Wikipedia)

Russia is a federation since 18th March 2014 consists of 85 federal subjects (members of the Federation). These federal subjects are of equal federal rights in the sense that they have equal representation—two delegates each—in the Federation Council (upper house of the Federal Assembly). They do, however, differ in the degree of autonomy they enjoy.

Six types of federal subjects are distinguished

22 republics	Adygea, Altai, Bashkortostan, Buryatia, Chechnya, Chuvashia, Crimea, Dagestan, Ingushetia, Kabardino-Balkaria, Kalmykia, Karachay-Cherkessia, Karelia, Khakassia, Komi, Mari El, Mordovia, North Ossetia-Alania, Sakha, Tatarstan, Tuva, Udmurtia
9 kraia	Altai, Kamchatka, Khabarovsk, Krasnodar, Krasnoyarsk, Perm, Primorsky, Stavropol, Zabaykalsky
46 oblasts	Amur, Arkhangelsk, Astrakhan, Belgorod, Bryansk, Chelyabinsk, Irkutsk, Ivanovo, Kaliningrad, Kaluga, Kemerovo, Kirov, Kostroma, Kurgan, Kursk, Leningrad, Lipetsk, Magadan, Moscow, Murmansk, Nizhny Novgorod, Novgorod, Novosibirsk, Omsk, Orenburg, Oryol, Penza, Pskov, Rostov, Ryazan, Sakhalin, Samara, Saratov, Smolensk, Sverdlovsk, Tambov, Tomsk, Tula, Tver, Tyumen, Ulyanovsk, Vladimir, Volgograd, Vologda, Voronezh, Yaroslavl.
3 federal cities	Moscow, St. Petersburg and Simferopol
1 autonomous oblast	Jewish
4 autonomous okrugs	Chukotka, Khantia-Mansia (administratively subordinated to Tyumen Oblast), Nenetsia (administratively subordinated to Arkhangelsk Oblast), Yamalia (administratively subordinated to Tyumen Oblast)

Autonomous okrugs are the only ones that have a peculiar status of being federal subjects in their own right, yet at the same time they are considered to be administrative divisions of other federal subjects (with Chukotka Autonomous Okrug being the only exception).

The Russian Federation is divided into 83 federal subjects (constituent units), **22 of which are republics**.

1. Adygea	6. Ingushetia	11. Komi	16. Tatarstan	21. Chuvashia
2. Altai	7. Kabardino-Balkaria	12. Mari El	17. Tuva

5. Dagestan	10. Karelia	15. North Ossetia-Alania	20. Chechnya	

The Russian Federation is divided into 83 subjects, of which **nine are kraia**, or krays ("territories"):

Specific operators of CCCP- registered aircraft Конкретные владельцы самолётов с рег. СССР-

In the on-line database of Soviet Transports we do mention the actual operator, where known, a CCCP- registered aircraft was operated with. We decided to do so as we did receive such data on the majority of aircraft mentioned in this database and it does enable us to see by whom, and where, an aircraft was operated at any specific time.

Civil operated aircraft

For Aeroflot civil operated aircraft this means the on-line database now presents the Aeroflot directorate an aircraft operated with.

Our major problem was the fact the documents we received were hand written - and sometimes very small hand writing - and between 25/50 years old. This meant the old ink suffered from the years and thus made details of transfers from one directorate to another directorate sometimes hard, and in few cases impossible, to read. The first directorate the aircraft was delivered to always was clearly readable.

Directorate	major airports
Arkhangelsk	Arkhangelsk-Talagi, Naryan-Mar
Central Region & Arctic	Belgorod, Bryansk, Mosco-Bykovo, Ivanovo, Kalinin, Kostroma, Kursk,Lipetsk, Myachkovo, Tula, Ryazan, Smolensk, Oryol, Tambov, Vladimir, Voronezh, Yaroslavl
Eastern Siberia	Bodaibo, Bratsk, Chita-Kadala, Irkutsk, Kirensk, Ulan-Ude
Far East	Birobidzhan, Blagoveshchensk, Khabarovsk-Novy, Komsomolsk-na-Amur, Nikolayevsk-na-Amur, Okha, Petropavlovsk-Kamchatky-Yelizovo, Tilichiki, Ust-Kamchatsk, Vladivostok-Knevichi, Yuzno-Sakhalinsk
International	Moscow-Sheremetyevo
Komi	Syktyvkar, Ukhta
Krasnoyarsk	Abakan, Achinsk, Baikit, Dudinka, Khatanga, Krasnoyarsk-Yemelyanovo, Kyzyl, Norilsk, Podkamennaya Tunguska, Tura, Turukhansk, Yeniseisk
Magadan	Anadyr, Magadan-Sokol, Markovo, Pevek
Moscow	Moscow-Vnukovo, Moscow-Domodedovo
Moscow SPIMVL	Polar Routes and Local Airlines, founded in 1958, renamed UGAT (Central Region & Arctic) in 1971
Northern	Leningrad-Shosseiny (renamed Pulkovo), Murmansk-Murmashi, Novgorod, Petrozavodsk-Besovets Velikiye Luki, Vologda
North Kavkaz	Maikop, Astrakhan, Grozny, Nalchik, Elista, Cherkessk, Krasnodar, Rostov, Ordzhonikidze, Stavropol, Volgograd, Makhachkala, Sochi-Adler
Privolzhsk	Ufa, Cheboksary, Kuibyshev, Yoshkar-Ola, Kazan, Saransk, Saratov, Penza, Orenburg, Ulyanovsk
Tyumen	Khanty-Mansiysk, Tyumen-Roshchino, Nadym, Nizhnevartovsk, Salekhard, Surgut, Tobolsk
Uralsk	Chelyabinsk-Balandino, Kirov, Kudymkar, Perm-Bolshoye Savino, Kurgan, Sverdlovsk-Klitsovo, Izhevsk, Magnitogorsk
Volga	Gorki-Strigino, Orsk
West Siberia	Barnaul, Gorno-Altaysk, Kemerovo, Novosibirsk-Tolmachovo, Omsk, Tomsk, Koltashovo, Novokuznetsk
Yakutsk	Yakutsk, Aldan, Bodaibo, Cherskiy, Chulman / Neryungri, Lensk, Mirny, Nyurba, Olekminsk, Tiksi

Directorates named after the countries that became independent after the break-up of the Soviet Union, like Ukraine UFA, are not mentioned in the above list but are in the Soviet Transports on-line database with the specific aircraft.

Civil Flying Schools

In addition to the specified individual operators in this edition of Soviet Transports are the Soviet Civil Flying Schools at Aktyubinsk, Buguruslan, Kirovograd, Krasnokutsk, Kremenchug, Sasovo and Ulyanovsk.

This is as far as aircraft operated with the MFA (MGA, Ministry of Civil Aviation) are concerned. For aircraft not operated with the MFA we present the actual operator where known.

Soviet/Russian Air Force (VVS) and Government

In this edition you are now able to see if an aircraft belonged to the Soviet/Russian Air Force (VVS) or government (i.e. the Vnukovo-based 235 flight unit).

About Soviet Air Force aircraft the following is of interest. It shows many military operated aircraft, operating in Aeroflot colours and with a CCCP- registration, entered the civil register in the early 1970s. We can imagine several reasons for this, but the bottom line is it resulted in an enormous difference between the date an aircraft was built (and possibly seen) and the date it was officially registered. Still, most important is all details, like the c/n, of those aircraft became known.

Also remarkable is many MAP and civil aircraft were transferred to the Soviet Air Force in June 1988 for a short period and have all returned to their operators. The only reason for this we can think of is the evacuation of the Soviet troops from Afghanistan.

Those 'requisitioned' aircraft are not mentioned in the on-line database as Soviet Air Force as they were just used by the military for some period of time.

The industrial complexes and test centres

The countless Soviet industrial (military and/or civil) production organisations (MAP, MOM, MMZ etc.) or test centres are mentioned, where known, as well.

Although we had professional, native Russian speaking help on hand for translating all documents, many old Soviet abbreviations that were used to identify the production and test centres in the hand written documents were sometimes hard to read and the meaning of some of these abbreviations still remains a mystery. Also they were often reported with the postal codes of the plant and not with their names. We have been able to identify 99 % of these postal codes. As such also where we know an aircraft is operated by the MAP but we do not know which MAP branch we just reported it as a MAP aircraft without the specific name.

From CCCP- to RA-, UK-, UN-, UR- etc.

When aircraft went from the CCCP- register to a new CIS register and retained Aeroflot colours and titles the operator is given as Aeroflot. This is to avoid the reporting operators in error as since the break up of the Soviet Union many where no longer part of an Aeroflot directorate but of a new, independent, airline.

Note:

Please bear in mind our data is just as good as the person that filed the data, sometimes as long as 70 years ago. As such any admin error will live on forever as there is in many cases no way to cross check. However, as not only the registers surfaced, but since 2010 also many MGA documents where where able to add the toc (taken on charge) trf (transfer) and soc (struck off charge) date from the majority of aircraft and add these to the on-line database,

Location codes used in the Soviet Transports database

Throuout the entire database we use the IATA three letter location indicators. However, not all airports have such an IATA location code and as such all three lettercodes marked * are unofficial codes and only used to safe space in the location column
