

Kamov Ka-15

The two-seat Ka-15 was the first Kamov helicopter to see production in quantity. Originally developed for the Soviet Navy, it made its first flight on 14th April 1953 and entered production at aircraft Factory # 99 in Ulan-Ude during 1956. Quite a few Ka-15s were operated by Aeroflot (among other things, as liaison and ice patrol helicopters stationed on icebreakers and whalers). A total of 354 Ka-15s of all versions were built, including the upgraded Ka-15M, the Ka-15MS crop-sprayer and the UKa-15 dual-control trainer.

The c/n is stencilled on the outer faces of the fins and on the forward fuselage beneath the cabin doors. The eight digit construction number consists of four pairs of numbers giving the type, factory code, batch number and number in the batch. The later, six digit construction number consists of just the type, batch number and number in the batch.

354 Ka-15 built by Factory # 99 at Ulan Ude-Vostochny from 1956 to 1960

 In this same series CCCP-30028, CCCP-30038 and CCCP-30094 are not used, also see c/n 159911-01

Kamov Ka-18

This was a purely civil derivative of the Ka-15M developed for heli-taxi and air ambulance duties, featuring a redesigned fuselage with a four-seat cabin and a hatch in the nose for loading a stretcher. The prototype took to the air on 13th October 1956 and a total of 111 aircraft were built at Factory # 99 in Ulan-Ude. The type remained in Aeroflot service for nearly 20 years.

The c/n is sometimes stencilled on the outer faces of the fins and on the forward fuselage beneath the cabin doors. The six-digit construction number consists of three pairs of numbers, giving the type, the batch number and the number in the batch. Batch 01 consisted of 5 helicopters, batches 02 to 06 of 10 and batches 07 to 09 of 20 helicopters.

Prototypes built by Factory # 938 at Lyubertsy-Ukhtomskaya from 1956 to 1957

Kamov Ka-22 "Vintokryl"

The Ka-22 was a convertiplane ("vintokryl" in Russian) conceived to bridge the gap between fixed-wing and rotary-wing aircraft. Design started in late 1952, and the first prototype was completed in autumn 1958. Although it made its first tethered hovering on 17 June 1959, the first real flight took place no earlier than 20 April 1960. Limited series production began at Factory # 84 at Tashkent in the same year.

Whereas the prototype was powered by two TV-2VK turboshaft engines, the production aircraft received D-25VK engines. The cargo bay of the Ka-22 was of the same size as that of the An-12. The 'Vintokryl' would have been able to transport up to 60 fully-equipped paratroopers, light armoured vehicles, artillery pieces or missile complexes. However, the technical problems related with such a complex rotorcraft were never solved and hampered the programme seriously.

After the crash of the first series-production Ka-22M on 28 August 1962, the 'Vintokryl' programme was ultimately downgraded to experimental status; and after the crash of the first prototype on 16 July 1964, it was eventually stopped. Priority was given then to the production of the Mi-6. The hours logged during the flight tests by all Ka-22s together were rather low: 82 hours and 59 minutes, consisting of 393 hoverings, 81 flights near the surface and 150 flights at higher altitudes.

The c/n for the production Ka-22Ms is explained as with most other Tashkent-built aircraft: The first digit represents the year of manufacture, followed by '34' indicating the factory number (84 !), than the two-digit batch number, and last two digits are the number in the batch.

2 Ka-22 prototypes built by Factory # 938 at Lyubertsy-Ukhtomskaya from 1957 to 1958

---	no code	Ka-22	Kamov OKB			static test airframe; handed over for trials to the TsAGI in early 1957

	no code	Ka-22V	Kamov OKB/AF c/s	f/f	aug63	factory trials completed jun64, w/o 16jul64 during joint trials when crashed near Ukhtomskaya; t/t as Ka-22V 13 hours 3 minutes

3 production Ka-22Ms built by factory # 84 at Tashkent-Vostochny between 1960 and 1962

1 34 01 01	no code	Ka-22M	Kamov OKB	f/f	16sep61	call-sign 63972; joint trials started feb62; w/o 28aug62 on the ferry flight from Tashkent-Vostochny to Lyubertsy-Ukhtomskaya when crashed on the leg between Turkestan and Jusaly
1 34 01 02	no code	Ka-22M	Kamov OKB			planned as static test airframe, but converted to flying example; however, perhaps never flown; stored at Tashkent-Vostochny for several years; scrapped
1 34 01 03	no code	Ka-22M	Kamov OKB			ferry flight to Lyubertsy-Ukhtomskaya terminated at Turkestan after the crash of 1340101 on 28aug62; upgraded late 1962/jun63; stored at Tashkent-Vostochny for several years; scrapped

Kamov Ka-25

The prototype of this military helicopter was first shown to the public at the '1961 Aviation Day flypast' over the urban Moscow airfield of Moscow-Tushino. The type basically followed the Ka-15 & Ka-18 formula with two three bladed co-axial contra-rotating rotors. Mainly designed for the Soviet Navy in its anti-submarine role, it also served aboard ships like the 'Moskva' and the 'Leningrad' each of which could accommodate some twenty aircraft. This version had a big radome under the nose and each of the four wheels was equipped with an inflatable pontoon to provide flotation in the event of an emergency landing on the water. There was a civil 'crane' version, the Ka-25K, which had a rear-facing gondola cabin in place of the radome under the nose. During the pick-up and release of loads, control of the helicopter was undertaken from the gondola. However, this version never saw production and the Mi-10K, with a greater lifting capacity, was preferred.

Ka-25 prototypes built by UVZ (Factory # 938) at Lyubertsy-Ukhtomskaya

D 01	no code	Ka-25	Kamov OKB	mfd	apr61	dynamic test airframe for fatigue trials, made a first hovering 26apr61; then to fatigue test programme; heavily damaged by ground resonance 21may61
DTs 02	no code	Ka-25Ts	Kamov OKB	mfd	1963	first Ka-25Ts prototype, in Soviet Navy c/s; f/f 1963
DB 03	no code	Ka-25PL	Kamov OKB	mfd	apr61	first Ka-25PL prototype, in Soviet Navy c/s; f/f 21may61; f/n above Moscow-Tushino 09jul61 with mock-up missiles; heavily damaged on landing by ground resonance 09may62 later coded "03"

475 Ka-25 built by UUAZ (Factory # 99) at Ulan Ude-Vostochny from 1965 to 1973

There seem to have been two ways of c/n presentation used at the same time. The last four digits seem to be the batch number and the number in the batch. In case of a seven-digit number the explanation seems to be that the first digit is the year of manufacture, followed by a '9' for Factory # 99 and a '1' or '2' for which the explanation is unknown.

Kamov Ka-26

The development of the Kamov Ka-26 began around 1964 with its predecessor, the Kamov Ka-15. The later Ka-26 is capable of carrying three times more payload than the Ka-15, and is mainly used for agricultural and ambulance purposes. Export customers were found within Germany (East and West), Romania, Hungary, Sweden and Bulgaria and recently countries such as Nigeria (ex German Air Force) and the new independent states within the CIS and the Baltics.

The unusual contra-rotating co-axial three-blade rotor system and the huge piston engines mounted on the side, give this helicopter its character. Although the engines look like jets, with the inlet fan forcing a cool airflow over the cylinders when the helicopter is not moving forward, they really sound extremely nice. Later versions were developed with only a pilot cabin enabling carriage of containers and lifting of heavier loads.

The production of the Kamov Ka-26 consisted of some 15 prototypes and pre-production helicopters. Normal production included 848 helicopters built at the Ulan-Ude Aviation Plant from January 1969 until 1977. However, Kumertau Aviation Production Association is also mentioned with regards to production of the Ka-26 starting in 1968. As there is just one c/n system known, and no double numbers exist, it seems that they either shared production using the same c/n sequence or possibly one plant was for final assembly whilst the other plant might just have built parts. Also bear in mind Kumertau built the " whilst Ulan-Ude was building thousands of Mi-8s during the same period. Reports of Kumertau starting production in 1968 is in line with the first c/ns known and, therefore, we think Kumertau was the final assembly line for the type.

The c/n can normally be found painted on the door-rail on the left hand side and has seven digits for production aircraft and is explained as follows. The first two are the year of production, the next three are the batch number and the last two digits represent the number in the batch. Batches 001 to 042 consist of ten helicopters, batches 043 to 064 of twenty helicopters and batch 065 of eight helicopters.

Kamov Ka-27/28/29/31 & 32

The Ka-27 was initially designed as a ship-borne anti-submarine helicopter to replace the Ka-25, it flew first in December 1973. The design continued with the traditional twin tail and counter-rotating main rotors and has been developed over the years into many different versions and sub-versions. These include the Ka-27PS (ship-based search and rescue helicopter), Ka-28 (export version of the Ka-27) and Ka-29 (ship-based assault helicopter). The Indian Navy acquired several Ka-28s which are operated by INAS 333 "Eagles" at INS Dega in Vizag and INAS 339 "Falcons" at INS Kunjali.

The Ka-31 (izd. 03D2) is a ship-borne AWACS helicopter with a 6 by 1 m aerial under the fuselage. Nine of them were fielded by the Indian Navy and are operational since April 2003. The Russian Navy, however, seems to prefer a further development, the Ka-35 (izd. 23D2). This new version is equipped with a radar developed by the NIIRT at Nizhni Novgorod and a 5.5 by 0.8 m aerial. The two Ka-35 prototypes were converted from the Ka-31 prototypes, and trials started in November 2004.

Ka-27 family prototypes built by UVZ (Factory # 938) at Lyubertsy-Zhulebino

	CCCP-04173	Ka-32	Kamov OKB	photo		prototype; some evidence suggests indirectly that this is the same helicopter as above; weighed at the factory at Ukhtomskaya 28dec79; hovered for the first time 11jan80 and completed factory trials 25jan80; in white c/s with orange trim, carried small 'Aeroflot' titles and 'polar bear' badges, type painted on as Ka-32; landed on the icebreaker "Sibir" 28jan80 and underwent trials in the Kara Sea jan80/may80
	"107" black	Ka-32	Kamov OKB	ph.	ju181	at Mirny (Crimea); in grey/white/grey c/s with Red Stars; was unveiled to the press and the public near Minsk 30oct81 as "107" black ?, having just been repainted from military markings (removal of the Red Stars); a photo also exists with small 'Aeroflot' titles and a Soviet flag, but no type is painted on
01-08	? "108" black	Ka-252	Kamov OKB	ph.	1980s	pre-production Ka-27PS; in grey c/s with small 'Aeroflot' titles
02-08	? "208"	Ka-31	Kamov OKB	photo		prototype; carried 'Aeroflot' and small unreadable titles '... SSSR' (c/n is possibly line # 02-08 ?); l/n Lyubertsy 29aug03; see c/n 5235002002211
02-09	? "209"	Ka-29	Kamov OKB	photo		prototype; in camo c/s with Red Stars and Soviet Navy flag
03-01	? "301"	Ka-27	Kamov OKB	ph.	1988	on board of the aircraft carrier "Tbilisi"; in grey c/s with small 'Aeroflot' titles
5750952	? "20" yellow	Ka-29TB	Russian Navy	ZIA	16aug92	this c/n was read off somewhere on the aircraft this date (also reported as c/n 52350036119804 see this c/n 1)

Ka-27/28 built by KumAPP at Kumertau-Vorotynovka since 1979

The construction number is explained as follows: starting with #523 (which is possibly a 'worked-around' factory number), followed by the product (izdeliye) code 500 & 501 for the Ka-27, the quarter and year of production and the last five digits being the famous "nonsense" computer number.

However, there seems to be a system regarding the last five digits. The first and second digits are a unique pair which is common only to the same batch of line-numbers, the third digit seems to be related to the version/type and the last two digits relate to the position within the batch of line-numbers. Depending on how many are actually in the batch of line-numbers, for example c/n ending 01 relates to the first helicopter within the line-number sequence, with c/n ending 43 (highest known) relating to the twenty eighth helicopter. The last two digits of the c/n and line number relate as follows:

c/n ends 01, 02, 04, 05, 07, 08, 10, 11, 13, 14, 16, 17, 19, 20, 22, 23, 25, 26, 28, 29, 31, 32, 34, 35, 37, 38, 40, 41 or 43

All c/n's marked # are prefixed by 523

#5002901201	"44"	Ka-27PL	Russian Navy	no	reports	line # 01-01; opb 396 okpve VVS BF at Donskoye; dbr 04may09 while trying to land on the new frigate "Yaroslav Mudry" which was undergoing trials in the Baltic Sea (some 10 km off Kaliningrad) when the rotors touched the superstructure of the ship and the helicopter fell onto the ship (damaging the "Kortik" SAM complex and the helipad) and further into the sea, all 5 crew injured

Kamov Ka-29 built by KumAPP at Kumertau-Vorotynovka since 1985

The construction number is explained as follows: it starts with 523 (which is possibly a 'worked-around' factory number), followed by the product (izdeliye) code 500 for the Ka-29, the quarter and year of production. Than the digit '1' which be to differ them from the Ka-28/28 production. Finally there is the last five-digits being the famous "nonsense" computer number. For further explanation see under Ka-27/28.

All c/n's marked # are prefixed by 523 !

Ka-32s built by KumAPP at Kumertau-Vorotynovka since 1986

To meet the needs of the Civil Aviation in the Soviet Union, the Ka-32 prototype first flew on 8 October 1980 and series production of the type commenced at Kumertau in 1986. A design requirement was the ability to carry cargo both inside the cabin or on a sling in order to allow the loading and unloading of ships both anchored or at sea. Other roles include offshore oil rig support, Search and Rescue, Police/Ambulance in addition to the transport of passengers.

Four main variants have been developed. The Ka-32S with comprehensive avionics for poor weather conditions and is used primarily for SAR, medevac and support operations, Ka-32T with basic equipment and avionics, used for utility work and passenger transport and the Ka-32A civil transport version certified to the equivalent of US FAR-29/33 airworthiness standards and the latest Ka-32A11BC. The Ka-32 construction number is normally given as a four digit number. It is believed to just be the batch number and the number in the batch or just the line number. Since 2011 Ka-32s have the a construction number which starts with 523 (which is possibly a 'worked-around' factory number), followed by the product (izdeliye) code 321 - Ka-32T, 322 - Ka-32S, 323 - Ka-32A and 324 - Ka-32A11BC followed by a two digit version number, so not a year or a quarter. The last four or five digits are the regular four digit batch number. The c/n plate is attached on the tail plane but hard to read as the view is blocked by the rudder in most cases.

All c/n's maked # are prefixed by 523 !

Kamov Ka-50 & Ka-52

The Ka-50 and Ka-52 are helicopter gunships with co-axial contra-rotating rotors, the former being a single-seater and the latter a two-seater (pilot and WSO). The Ka-50 lost out in the long drawn-out competition against the Mi-28, and only a few were built. Not a single one of them was operational by the summer of 2012. The future of the Ka-52 looks brighter as dozens were ordered for Russian Army Aviation and the naval version Ka-52M will serve on the "Mistral" class helicopter carriers.

7 ? V-80 prototypes built by UVZ (former Factory No. 938) at Ukhtomskaya in 1982/90

The construction number consists of the factory code 879, the type code 80 and a five-digit sequential number starting with 00011.

87980 00011	"010" white	V-80	Kamov OKB	f/f	17jun82	line # 00-01; first prototype; powered by TV3-117V engines; in dark blue c/s with fake door and windows painted on, no markings apart from code; first real flight 23jul82 (the first flight was just a hover); w/o 03apr85 when the rotors collided during energetic manoeuvring outside the flight envelope, pilot (Yevgeni Laryushin) killed
87980 00012	"011" yellow	V-80	Kamov OKB	f/f	16aug83	line # 00-02; second prototype; powered by TV3-117VMA engines; in blue c/s; demonstrated to the Soviet leadership in Minsk-Machulishchi apr85
	"011" white	V-80	Kamov OKB			initially in yellow c/s; nose later modified with a mock-up of the "Merkuri" TV targeting system; repainted in olive drab/khaki camo c/s with light blue underside; t/t 620 hours; stored with Kamov at Ukhtomskaya, seen nov11/oct14; possibly scrapped
87980 00013	"012" white	V-80	Kamov OKB	mfd	dec85	line # 00-03; third prototype; with a mock-up of the "Merkuri" TV targeting system; in camo c/s; f/n ZIA aug92; l/n ZIA aug93; stored with Kamov at Ukhtomskaya (reportedly preserved)
87980 00014	"014" yellow	V-80	Kamov OKB	mfd	mar89	line # 00-04; fourth prototype; in camo c/s; modified with GOES-520 and GOES-330 optical-electronic systems in 1999 (Ka-50N); l/n ZIA aug99; stored (without cabin) with Kamov at Ukhtomskaya; probably converted into a Ka-52 around 2002
87980 00025	"015" yellow	V-80	Kamov OKB	mfd	apr90	line # 00-05; fifth prototype, pattern helicopter for series production; with a mock-up of the "Stolb" FLIR system; initially in camo c/s, later in all-black c/s; featured in the Russian movie "Chornaya akula" (Black Shark) shot in 1992; modernised by 1999; demonstrated in Turkey aug99/oct99; took part in combat operations in Chechnya in late 2000/early 2001; converted into a Ka-50
	no code	Ka-50	Kamov OKB	ph.	2002	in camo c/s of two shades of olive drab with light grey underside; f/n Zhulebino 2002
	"25" yellow	Ka-50	Russian Air Force	ZIA	24aug03	opb 929 GLITs at Akhtubinsk; in olive drab/khaki camo c/s with some black patches and light blue underside; code painted on in late 2002; took part in the exercise "Rubezh-2004" in Kyrgyzstan aug04; l/n operational ZIA 22aug07; stored at Akhtubinsk, seen may09/sep15
87980 00026	? --	V-80	Kamov OKB	mfd	1990	line # probably 00-06; static test airframe
87980 00027	? --	V-80	Kamov OKB	mfd	1990	line # probably 00-07; static test airframe
87980 00028	"018" white	Ka-50Sh	Kamov OKB	f/f	04mar97	converted from Ka-50 line # 001 in 1997; received new line # 00-08; equipped with a "Samshit-50" optical-electronic system; in olive drab/khaki/grey camo c/s; already f/n ZIA 17aug05; displayed at the IDEX '97 defence exhibition at Abu Dhabi 16/20mar97; sensors on the nose changed position jun99; took part in the exhibition at Nizhni Tagil in 1999; l/n ZIA aug99
	"18" yellow	Ka-50Sh	Kamov OKB	ZIA	17aug05	in olive drab/khaki/black camo c/s with light grey underside; last flight 29jun10; seen Torzhok dec11; stored with Kamov at Zhulebino, seen apr12/feb16
---	--	V-80	Kamov OKB	ph.	26sep10	NPPU-80 (fuselage without equipment only); used for ground trials (ability to survive enemy fire) at the test range of GKNIPAS at Faustovo (Voskresensk district of the Moscow region), derelict by sep10

17 ? Ka-50 built by AAK "Progress" (former Factory No. 116) at Arsenyev in 1991/2009 (9 until 2005)

The construction numbers consist of the factory code 353, the product (izdeliye) code 805, the quarter and year of manufacture (one digit each), the batch number (two digits) and three arbitrary digits which increase within the batch. c/ns marked # are prefixed by 353805

001	"018" yellow	Ka-50	Kamov OKB	f/f	19may91	also given as 22may91; first series-production Ka-50; initially in typical Ka-50 camo c/s; trf to 929 GLITs at Akhtubinsk jan92; underwent joint state trials feb92/dec93; repainted in three-tone camo c/s in 1994; converted to Ka-50Sh c/n 8798000028 in 1997
# 3 2 01003	"020" white	Ka-50	Kamov OKB	mfd	1992	line # 01-01; second series-production Ka-50; in all-black c/s; named 'Werewolf'; f/n FAB sep92; carried exhibition number 'H318' at LBG jun93; f/f sep93; l/n ZIA aug95
	"024" white	Ka-50	Kamov OKB	r/r	1995	in all-black c/s; f/n FAB sep96; carried exhibition number 'H347' at LBG jun97; displayed in Finland and India in 1998; l/n with exhibition number 'H347' ZUH nov00; l/n active ZIA 16aug05; converted into a VR-80 ground-test rig; stored with Kamov at Ukhtomskaya, seen apr12
# 3 2 01012	"021" white	Ka-50	Kamov OKB	mfd	1992	line # 01-02; named 'Black Shark'; carried exhibition number 'H317' at LBG jun93; l/n ZIA aug93; converted by Kamov OKB to Ka-52 c/n 87980006003 in 1994/96
# 4 3 01035	"22" yellow	Ka-50	Russian Air Force	mfd	1993	line # 01-03; opb 344 TsBP i PLS at Torzhok from 1995; named 'Black Shark'; received a 'shark mouth' in early 1997; f/n AUH 16mar97; displayed at the IDEX '97 defence exhibition at Abu Dhabi 16/20mar97; w/o 17jun98 on a test flight from Torzhok when the rotors collided during energetic manoeuvring outside the flight envelope and the helicopter crashed near Torzhok, pilot (the commander of 344 TsBP i PLS, Major-General Boris Vorobyov) killed
# 4 3 01099	no code	Ka-50	Russian Air Force	mfd	1993	line # 01-04; in olive drab/khaki camo c/s with light grey underside; took part in combat operations in Chechnya in late 2000/early 2001; l/n Zhulebino 2003
	"24" yellow	Ka-50	Russian Air Force	Brk	17sep06	opb 344 TsBPiPLS (redesignated filial 4 TsBP i PLS in 2010) at Torzhok; initially in olive drab/khaki camo c/s with light grey underside, with Red Stars and without titles, l/n as such Torzhok 14apr09; repainted in black c/s with 'VVS Rossii' titles and Russian stars; f/n as such Torzhok 04may10; last flight 27sep10; used as a ground instructional airframe by Voronezhskoye VAIU at Voronezh-Baltimor from may11, seen jun12/may13
---	--	Ka-50		no	reports	line # 01-05; probably converted to a Ka-52
# 3 3 02030	"20" yellow	Ka-50	Russian Air Force	mfd	1993	line # 02-01; opb 344 TsBPiPLS at Torzhok from 03nov93 until 1997/98; in camo c/s; took part in the Victory Day parade over Moscow 09may95; stored with Kamov at Ukhtomskaya, seen apr05; possibly scrapped
---	--	Ka-50		Asp	mar05	on the assembly line, l/n apr07; line # 02-02; probably converted to a Ka-52

1 Ka-52 prototype converted probably by UVZ (former Factory # 938) at Ukhomskaya in 1996

---	not known no code	Ka-52 Ka-50-2	Kamov OKB Kamov OKB	ZIA ph.	aug95 sep99	full-scale mock-up full-scale mock-up of the "Erdogan" version of the Ka-52 for Turkey (probably built using a rear fuselage of a Ka-50); seen in olive drab c/s as well as in sand/brown camo c/s; displayed at the IDEF '99 defence exhibition at Ankara sep99; l/n ZIA aug01
8798006003	"061" black	Ka-52	Kamov OKB	mfd	nov96	first prototype, converted from Ka-50 c/n 3538053201012 line # 01-02; new line # 00-01; equipped with a "Samshit-E" optical-electronic system; in all-black c/s; named "Alligator"; demonstrated to journalists 19nov96; displayed at the "Aero India-96" exhibition at Bangalore dec96; f/f 25jun97; modified several times and used as a demonstrator for the Russian MoD, for the proposed Ka-50-2 "Erdogan" for Turkey (demonstrated there oct98 and aug99/oct99) and for the proposed Ka-52K for South Korea; l/n ZIA 19aug05
	"061" yellow	Ka-52	Russian Air Force	ZIA	17aug07	armed with "Ataka" ATGMs; in light grey/dark grey camo c/s with light grey underside; started joint state trials in 2008; underwent ship trials on the ASW ship "Vitse-admiral Kulakov" at Severomorsk 31aug11

Ka-52 built by AAK "Progress" (former Factory No. 116) at Arsenyev from 2008

The construction numbers initially consisted of the factory code 353, the product (izdeliye) code 826, the quarter and year of manufacture (one digit each), the batch number (two digits) and three arbitrary digits which increase within the batch. Starting from batch 5, the quarter and year of manufacture were dropped. Batches 1 to 7 contained five helicopters while starting from batch 8 all batches contained ten helicopters. c/ns marked # are prefixed by 353826

# 2 8 00002	"062" yellow	Ka-52	Kamov OKB	f/f	27jun08	second prototype, converted from a Ka-50; new line # 00-02; armed with "Vikhr" ATGMs; in Russian Air Force colours (olive drab/khaki camo c/s with some black patches and light grey underside); started joint state trials in 2008; f/n Chkalovski 26dec08; l/n as such ZIA 23aug09; f/n with "VVS Rossii" titles and Russian stars sep12; l/n Ukhomskaya 07apr14
	"062" yellow	Ka-52K	Kamov OKB	Zhu	23dec15	prototype of the ship-based version; in Russian Air Force colours (olive drab/khaki camo c/s with some black patches and light grey underside, with "VVS Rossii" titles and Russian stars; trials started 16jan15; l/n in MVZ im. Milya 23jan18
# 4 8 00003	"063" yellow	Ka-52	Kamov OKB	f/f	28oct08	third prototype, converted from a Ka-50; ew line # 00-03; in Russian Air Force colours (bluish grey/dark grey camo c/s); started joint state trials in 2008; f/n over Moscow 20may09; l/n Kubinka 20apr10
	"063" yellow	Ka-52	Russian Air Force	Akc	25sep10	with "VVS Rossii" titles and Russian stars; repainted in camo c/s of two shades of olive drab plus black, with light blue underside; f/n as such Ukhomskaya 06jun13; displayed at the Paris Air Show at LBG 17/23jun13 (without exhibition number); l/n Zhulebino (LIK OKB Kamova) 01aug14
# 3 9 01001	"51" yellow	Ka-52	Russian Air Force	d/d	2009	line # 01-01; pre-production helicopter (probably built using Ka-50 assemblies), designated Ka-52A in some sources (as the first Ka-52A); started joint state trials in late 2009; opb 929 GLITs at Akhtubinsk; in bluish grey/medium grey camo c/s; f/n Ukhomskaya 25mar10; with "VVS Rossii" titles and Russian stars from 2011; seen Zhulebino 27feb14; f/n with the new OES-52 suite Shcholkovo 10aug16
# 4 9 01002	"52" yellow	Ka-52	Russian Air Force	d/d	2009	line # 01-02; pre-production helicopter (probably built using Ka-50 assemblies), started joint state trials in late 2009; opb 929 GLITs at Akhtubinsk; in olive drab/khaki camo c/s with light blue underside; initially without titles and with Red Stars, l/n as such Kubinka 20apr10; f/n with "VVS Rossii" titles and Russian stars Kubinka 09may10
	"52" yellow	Ka-52K	Kamov OKB	Zhu	14oct13	trf in autumn 2013 for development work for the ship-based version; in olive drab/khaki camo c/s with light blue underside, still with "VVS Rossii" titles and Russian stars; w/o 29oct13 on a test flight from Zhulebino when started to rotate clockwise at a height of some 60 metres, crash-landed on the territory of the Zhulebino test site, caught fire and burnt out, both pilots seriously injured
# 4 9 01003	"53" yellow	Ka-52	Russian Air Force	d/d	2009	line # 01-03; pre-production helicopter (probably built using Ka-50 assemblies), started joint state trials in late 2009; opb 929 GLITs at Akhtubinsk; in olive drab/khaki camo c/s with light blue underside; f/n Kubinka 13apr10; f/n with "VVS Rossii" titles and Russian stars Rostov-na-Donu-Tsentralny jul10; l/n Akhtubinsk 26sep15

Kamov Ka-60 "Kasatka" & Ka-62

The Ka-60 "Kasatka" (means 'orca' in Russian) is the first Kamov helicopter with a standard lay-out instead of the co-axial rotors so typical of this design bureau. This utility helicopter belongs to the same class as the long ago withdrawn Mi-4 and is destined to replace the smaller Mi-2 as well as the larger Mi-8. Development started in 1984, and a full-scale mock-up was built in 1990. The first prototype was manufactured in 1997 and flew first on 10 December 1998. Factory trials were completed in 2003, and state trials were to begin at about the same time.

The "Kasatka" is the first Russian helicopter designed in compliance with the new Russian AP-29 standard adapted to meet the American FAR-29 requirements. It is powered by two Rybinsk RD-600V modular-design turboshafts.

There will be several models: the standard Ka-60 is a transport and assault helicopter to be employed over the battlefield together with Ka-50 or Mi-28 gunships. It can carry 14 paratroopers or 2 tonnes of payload in the cabin (2.7 tonnes on external sling), but can also be used for SAR, medevac and various patrolling duties. Planned specialised versions are the Ka-60U military trainer, the Ka-60R for reconnaissance, targeting and co-ordination of combat helicopter operations and the Ka-60K ship-borne helicopter for naval reconnaissance and over-the-horizon targeting which will replace the Ka-25Ts.

The Ka-62 civil transport helicopter was developed on the basis of the Ka-60. It is highly standardized with the assault helicopter and can carry 14 to 16 passengers or the same internal and external cargo as the Ka-60. Development started in 1992, and a full-scale mock-up was built at around that time. An export version, the Ka-64 "Skyhorse", was under development in co-operation with Agusta of Italy from 1995. This helicopter was to be powered by General Electric CT7-2DL (T700) turboshafts and equipped with Western avionics. However, development was frozen after completion of the basic design stages in 1996.

Series production of the Ka-60 is planned at the Lkhovitsy outlet of RSK MiG and at the Ulan-Ude Aircraft Factory, whereas the Ka-62 is to be built at the "Progress" factory in Arsenyev. However, three factories may be more than enough for the small numbers expected to be built...

Kamov Ka-126 & Ka-226

The Ka-126 was a further development of the Ka-26 with a turboshaft engine. Series production was to take place at the Brasov Aircraft Factory in Romania as part of the economic co-operation within the CMEA (Comecon). Between 1988 and 1991, twelve Ka-126s were built at Brasov, although nine of them did not receive engines because they were unable to produce them (7 of these unfinished helicopters were later handed over to Kamov OKB).

As the Ka-126 became a failure because of the economic problems and the downfall of socialism, the Ka-226 was developed. It is equipped with Rolls-Royce (or Allison) engines and is simultaneously built by PO "Strela" at Orenburg (former Factory # 47) and the Kumertau Helicopter Plant. However, because of the economic situation in modern Russia, output has been limited so far. Launch customer was the Russian Ministry for Civil Aid and Protection (MChS), and the second order came from Gazprom which signed a contract for the delivery of 50 Ka-226s between 2002 and 2007. The first helicopters built will be of the transport version, but later examples will be configured for pipeline monitoring and SAR.

The c/n plate can be found on the under the fairing of the right-hand side undercarriage strut.

The designation of the helicopters built at Kumertau is Ka-226.50 and the one of those built at Orenburg just Ka-226 (the drawings carry the designation Ka-226.00, though).
